In one version of the fanon, The **Ichorous Slimes** also known as a **Shoggite** are a race of originally non-sentient amorphous, shapeshifting Cosmic Horrors that were around before and still exist after the Protas-Cosmic Horror War, they were created and originally served the Elder Things. They gained sentience over their existence leading to them rebelling against the Elder Things.

History

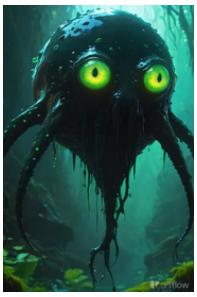
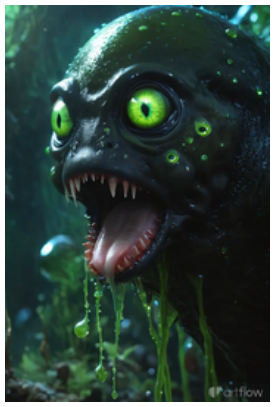
Physiology

Stage 1	Stage 2	Stage 3	Stage 4	Stage 5





At the youngest stage of their life, an Ichorous Slim could only take on simple shapes and forms, such as a floating blimp-like entity with simple grabbing appendages like tentacles.	As their lifecycle continues and they gain more experience and control with their amorphous physiology, Ichorous Slimes are able to form mouths, fangs and claws, they can take the form of entities the size of children with a quasi-humanoid appearance.	Considered to be a 'teenage' stage in their life cycle they are still unable to form hands or feet perfectly, but can make a humanoid torso with a monstrous head. Still unable to blend in with humanoids they like their younger stages will stay in a Ichorous Slime hive living and continuing to practice.	Considered to be an adult, this stage can be released from the hive safely at night and can blend in with humanoids as long as they don't take off their hoods, as such this stage and the next handle matters for the hive amongst humanoid populations.

Appears in its true base form as a gelatinous creature with luminous green eyes. It can freely transform its body by altering its cellular structure allowing it to form just about anything it needs at the moment (i.e. hands, tools, natural weapons, etc).

Abilities

Racial Abilities

Eldritch Abomination: An **Ichorous Slime's** is a being whose very existence defies the rules of nature and/or existence and is defined by its disregard for the natural laws of the universe as we understand them.

- **Alien Mind**: The inner workings of an **Ichorous Slime's** mind differ greatly from what could be considered "normal" or "sane" by the standards of most living things.

  Forbidden Knowledge: Older **Ichorous Slimes** because of their time spent with the Elder Things often possess a dark and forbidden form of knowledge that was never meant for mortals to know. This kind of information can range from being scientific, magical, or eldritch and can give the others access to abilities and capabilities far beyond human comprehension though at a dire price of being cursed with said knowledge or in losing something precious; such as one's sanity, life, or worse. Such knowledge is considered extremely dangerous and unnatural because the information can come from dark or eldritch origins bestowing unnatural capabilities such as reanimating the dead, opening gateways to dangerous worlds, create galactic level pandemics, etc, all of which can cause catastrophic events.
- **Amorphous Physiology**: The **Ichorous Slime's** body is composed of a flexible, amorphous substance that can be manipulated in a variety of ways. Physical attacks only harmlessly reorganize their basic shape due to their lack of vital pieces, as each part of their mass is molecularly consistent.
  - **Boneless Body**: Unless they choose to have one, an **Ichorous Slime** has no bones, often making them highly flexible.
    - **Blunt Force Immunity**: While they do not have bones an **Ichorous Slime** has immunity to damage from blunt force weapons like hammers.
    - **Unsupported Motion**: An **Ichorous Slime** can move and attack normally, even when their body is loose and unsupported, for example not having bones to support one's body or is much like jelly. An **Ichorous Slime** can still move and attack, even if affected by something such as Rigidity Removal that would normally take away their ability to stand or move. An **Ichorous Slime** can walk, run, jump, punch, roll, kick, swing, etc. like they had bones (or something similar to support their structure), even though they have none, or not at the moment, anyway.
  - **Doppelgänger Morphing**: An **Ichorous Slime** can alter their form to take on the physical appearance of others, typically when they've seen said other at least once.
- **Liquid Mimicry**: An **Ichorous Slime's** body is made up completely of a naturally liquid substance which they can instinctually shift into different shapes and forms of matter.

  Near Intangibility: An **Ichorous Slime** can pass through anything that isn't liquid proofed by flowing through the cracks and holes.

- **Regenerative Healing Factor**: An **Ichorous Slime** possess a regenerative healing factor, meaning that they can automatically and rapidly heal for any physical and mental damage, attacks, harm, damage, and injuries they take and get restored to their optimal and full health/state at an extremely fast rate. Unlike Healing, regeneration/healing factor is a process that happens unconsciously without the need for activation, resulting in a constant state of optimal health.
- **Slime Mimicry**: The body of an **Ichorous Slime** is completely made of slime/goo.
  - **Gookinetic Shapeshifting**: An **Ichorous Slime** can transform/reshape their slime form as desired to adapt to varying situations, impersonating others, enhancing their body for combat, turning into animals, monsters, etc. It can also be used to slip through cracks, and restrain an opponent.
    - **Shapeshifting Combat**: An **Ichorous Slime** can utilize shapeshifting with their physical combat, changing their form for attack, defense, movement, and distraction, forming weaponry from their bodies, etc.
    - **Tool Forming**: An **Ichorous Slime** can utilize shapeshifting to transform a part of their body into a tool even a specialized one to manipulate or repair objects.
    - **Transformation Arts**: An **Ichorous Slime** can utilize the Transformation Arts, a specialized system of techniques based on transformative/shapeshifting abilities. An **Ichorous Slime** can transform into states of higher power or even mimic the physiological powers of other entities.
  - **Slime Hair**: While disguised as a humanoid an Ichorous Slime can disguise the slime on their head to resemble and behave like hair.
- **Vocal Replication**: An **Ichorous Slime** can mimic the voices of others or imitate sounds such as animal noises and explosions. Any sound a **Ichorous Slime** hears they can replicate with perfect clarity along with any manner the sound was made.

Behaviors

Mimicry

An **Ichorous Slime** learns via mimicry and observation of a target so the older the Slime and the more practiced it is the better at mimicry it will be with ancient, very intelligent **Ichorous Slime's** being able to pass as other species for long periods of time if not indefinately.

Trivia

During the war, Noxlena would acquire an **Ichorous Slime** and use it as the basis for a new classification of slime-like creatures, these would be far less aggressive than their originals.

Notes

- The race known as the **Ichorous Slimes** is a purely fanon creation as such there is no official proof of their existence in the Witcher works outside the fanon community.
- **Ichorous Slimes** like all of the Cosmic Horrors are based upon the beings from the Cthulhu Mythos of author H.P Lovecraft in this case the Shoggoths.
- The existence of the Cosmic Horrors are a personal iteration for the fanon by Adalwulf of Aedirn, as such their existence in the fanon is not 'definitive' and is subject to the decision of inclusion in others head canons.
- My articles are to cultivate storytelling and inclusion, should you want to include **Ichorous Slimes** in your stories feel free to do so.
